TP Lj became the largest innovation ecosystem for commercialisation of knowledge and technology in SE Europe

Global Start Up ecosystem

- Recognised by EU, OECD, IASP, EWRC etc.
- **Start:Up Slovenia Initiative**
- **€3.5m+** investment into 60+ startups annually (together with Ministry for Economy & Slovene Enterprise Fund)
- **150+** business mentors
- 11+ national & regional programmes

Global network

- 400+ Tech parks, 73 countries connected in IASP global network
- **100+ partners collaborating** on 40+ commercial & EU projects
- 3 vertical sector networks for regional collaboration

Excellent infrastructure

- 75.000 m²+ of high quality infrastructure
- Smart City & living services and programmes
- **300+ members**, SMEs with 1.500+ employees

22 international and 6 national initiatives in value of over 4 million EUR

digitalLIFE4CE Interreg Central Europe

Fostering innovation in integrated healthcare systems solutions

digitalLIFE4CE project creates a **CE area of excellence** in the field of **digital integrated healthcare systems** solutions where flexible, solution oriented cooperation mechanisms can be rapidly activated and transferred to all its strategic actors. Project brings together 7 CE areas and the **most appropriate mix of policy / R&D / implementation relevant actors** which will allow to jointly tackle the complex challenges.

Main project outputs:

- IT based Open Innovation platform.
- Transnational digital health community.
- Programme for supporting the development of digital health community.

Budget:

- Total: € 1.551.182,37
- TP Lj: € 178.874,20

Project partners (10):

University of Applied Science Burgenland Austria - Technology Park Ljubljana Slovenia – Science and Technology Park of the University of Rijeka Ltd – Pannon Business Network Association Hungary – Wrocław Technology Park Poland – Gesundheitsforen Leipzig GmbH Germany – Association for promoting of health business in the region of Leipzig Germany – Autonomous Province of Trento Italy – Bruno Kessler Foundation Italy

TRAIN Interreg Italia Slovenia

Big Data & Disease Models: Transnational platform of validated kits for BioTech Industry

TRAIN will **increase the cooperation between key actors in biomedicine**, such as research institutions, universities and companies on a transnational level Slovenia-Italy. TRAIN interconnects interdisciplinary research activities and new technologies, which when combined **stimulate biotechnological innovations**. Successful interdisciplinary cooperation will exhibit itself in the project's research & innovations, successfully transferred to the private sector.

Main project outputs:

- **Reinforced synergy** between research institutions & BioTech companies
- Permanent **cross-border platform** for BioTech R&I.
- Diagnostic & Therapeutic services developed.

Budget:

- Total: € 1.243.702,21
- TP Lj: € 143.363,88

Project partners (6)

ICGEB Italy - Technology Park Ljubljana Slovenia – Institute Jožef Štefan Slovenia –
Experteam srl Italy – BioValley Investments Italy – Jožef Štefan International Postgraduate
School Slovenia

TPLJ is Initiator & Active Member of the **Independent Initiative HealthDay.si.**

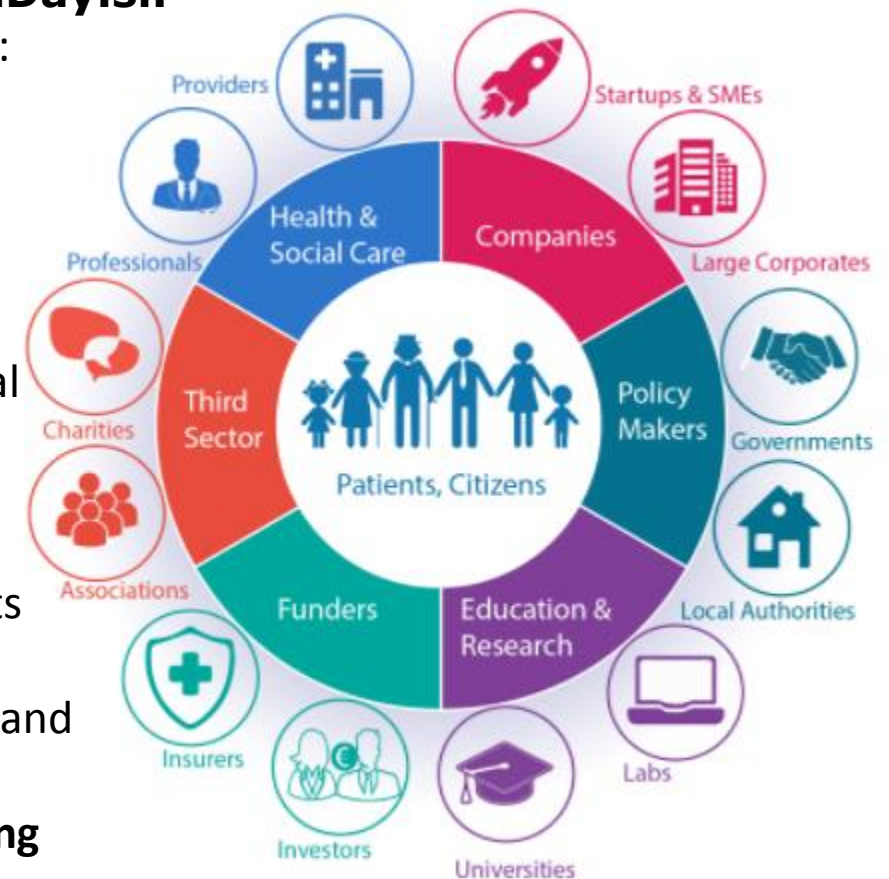

Community of all stakeholders, open to all regional and international partners:

- Health 2.0,
- ECHAlliance,
- Coral.

Main goal: Helping each other in entering international markets & stimulating local health and social care community towards embracing change through identified projects, cooperation and introduction of digital solutions.

Achievements:

- Organised more than 15 events & meetups & 4 annual conferences with international speakers and hosted more than 800 attendees at the events
- Connect more than 15 start ups with strategic partners and investors
- Issued 2nd edition of the Green Book presenting digital health solutions and companies and opened dialogue with key national stakeholders
- Investment forum, B2B meetings, P2P, **transferring knowledge on building specialized ecosystem (CRO)**

Flagship BioTech & BioMed companies

TEHNOLOŠKI PARK LJUBLJANA
01

COSYLAB

[Cosylab](#) develops control systems for particle accelerators, telescopes, fusion power-plants, and software for medical proton-therapies. All of the company's products & services are the product of in-house knowledge & development. Since its founding, Cosylab has operated on the world market.

BIOSISTEMIKA

[BioSistemika](#), research and development Ltd. is a spin-off company of National Institute of Biology. Company offers establishment of laboratory processes, software support and other services and products in the field of molecular biology and systems biology.

ACIES BIO

[Acies Bio](#) is a biotechnology contract research organization offering state-of-the-art R&D services to pharmaceutical, chemical, biotech & food industries. They combine biotechnology & synthetic organic chemistry for efficient production of natural/semi-synthetic or fully synthetic compounds

GENEPLANET

[GenePlanet](#) is a leading European provider of innovative healthcare and lifestyle solutions based on preventive genetic testing. Based on the results, people can adjust their lifestyle accordingly and take measures that will shield them from genetic predispositions.

BIA SEPARATIONS

[Bia Separations](#) has developed its own technology and tools for the separation of large protein molecules, principally for production and purification processes and diagnostics.

EDUCELL

[Educell](#) is a small biotech company founded in 1997, who earns more than 95 % of its income on the market. The company is devoted to bring effective cell treatments to patients by providing effective and cost-beneficial products.
