# Smart technologies or Smart solutions

- It is impossible to talk about smart technologies and not talk about smart solutions .
- Smart technologies are part of the smart solutions that contribute to better health,

# Smart technology

- Personal technology, personalized technology
- Technologies in use in the health care system
- Technologies in other sector

27 settembre 2018

# Policy for technologies innovation

- New policy and strategy is planned for 2020
- it is planned that part of the strategy will focus on technological innovations that should contribute to better health outcomes

## Policy for technologies innovation

- The biggest challenge is to create a unique information system
- To strengthen education processes using technology
- To compensate the lack of physicians who are created for the mobility of the workforce
- More efficient use of personalized technologies for the promotion of public health
- Improving diagnosis and treatment
- Use of technology in other sectors that contribute to health (Health in all policy)
- Working with students at the university

Thank you for your attention
